DETAILED ACTION

Claims 1-8, 14-22 are pending in this application. This is the first office action on the merits. The claimed subject matter of the independent claims 1 and 14 in this case is deemed to be allowable. However, there are several minor issues that need to be corrected. A phone call was placed to James Slattery who is out of the office for approximately two weeks and currently unable to correct these issues over the telephone.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 14 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claim 14 is objected to because of the following informalities: This claim has no defined preamble and the metes and bounds of the claim is unclear. Furthermore, this claim uses the term "a computer intended to" which could possibly negate all claim elements recited as performed by a computer if this is viewed as an intended use. This claim should be amended to clearly define a preamble and modified so that the computer clearly performs its respective claim elements. Appropriate correction is required.

Application/Control Number: 10/539,553 Page 3

Art Unit: 2125

4. Claim 21 is currently dependent upon non-existent claim 11. Examiner believes that for proper antecedent basis of claim elements, this claim should be dependent upon claim 19.

Allowable Subject Matter

- 5. Claims 1-8 are allowed in their current form. Claims 14-22 contain allowable subject matter pending correction of the USC 112 rejections noted above.
- 6. The following is an examiner's statement of reasons for indicating allowable subject matter:
- 7. While PCT WO 01/81031 A1 shows the generic computer controlled radiation gun and powder layer building system similar to the current invention, neither this reference taken alone or in combination with the prior art of record disclose "said three-dimensional product being formed by successive fusing together of successively formed cross sections from by the powder dispenser, characterized in that the control computer is arranged so as to divide said selected area into one or more inner areas I which each have an edge R, and to control the radiation gun to fuse the inner area 1 in the course of a movement pattern for the focal point of the beam of the radiation gun which comprises a main movement direction and an interference term which is added to said main movement direction and has a component in a direction at right angles to the main movement direction."
- 8. It is this division into inner areas and movement direction with an interference term in a direction at right angles to the main movement direction, in combination with the remaining

elements and features of the invention, that the applicant's invention defines over the prior art of record.

9. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

This application is in condition for allowance except for the following formal matters:Correction of USC 112 issues and dependency errors.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael D. Masinick whose telephone number is (571) 272-3746. The examiner can normally be reached on Mon-Fri, 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard can be reached on (571) 272-3749. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
